SUMMARY

Generalist operator who takes ownership of messy, real-world problems and builds the systems and workflows that make a business run. Experience spans consulting, university operations, and founding two businesses from scratch, with a track record of turning operational data into decisions teams actually use. Comfortable wearing many hats, learning a new domain fast, and shipping work that holds up under real constraints.

EDUCATION

University of Pennsylvania – Philadelphia, PA

• B.S.E. in Systems Engineering | Minor in Mathematics | Concentration in AI and Data Analytics

May 2026

GPA: 3.5

PROFESSIONAL EXPERIENCE

Black Wharton Consulting – Operations & Analytics Consultant | Philadelphia, PA

October 2023 - January 2026

- Took ownership of ambiguous client problems, building and deploying solutions from problem definition through rollout and adoption.
- Translated messy operational data into deployable workflows and systems, driving \$200K+ savings and 8–12% revenue lift.
- Worked cross-functionally to structure decision workflows and ensure outputs were reliable, interpretable, and used in real operations.
- Operated in fast-moving environments, diagnosing data issues and maintaining execution quality under incomplete information.

Aureon Ventures – Founder and CEO | Trelawny, Jamaica

June 2021 - May 2022

- Built and operated logistics and tutoring businesses from scratch across Jamaica, owning pricing, routing, staffing, and service workflow.
- Increased unit profitability 25%+ and generated 3M+ JMD in revenue through pricing and routing models built around real demand.
- Iterated on pricing, routing, and service workflows using customer feedback, sustaining profitability across two businesses at once.

University of Pennsylvania Residential Operations – Operations & Data Systems Manager | Philadelphia, PA

May 2024 - August 2024

- Built and deployed data pipelines across 10K+ residents, improving allocation accuracy by 20%+ in real-time operations.
- Turned messy operational data into structured workflows and reporting used for real-time planning and allocation decisions.
- Led rollout across non-technical teams, ensuring systems were adopted, trusted, and consistently used in live operations.

Everglades Farms – Operations Strategy Intern (CPO Office) | Trelawny, Jamaica

June 2020 - August 2020

- Built structured data tracking workflows to drive stakeholder alignment and improve visibility across operational processes.
- Analyzed operational and sales processes to identify bottlenecks and designed process maps to support scalable execution.
- Built decision models used by leadership to evaluate pricing, fulfillment, and customer demand patterns.

PROJECTS

AI Content Workflow Bot - Content Automation Tool

August 2025 - September 2025

- Built a lightweight internal tool that turns product content and notes into ready-to-edit marketing and social drafts.
- Automated a repetitive content task into a reusable pipeline, cutting manual drafting time for the team.
- Designed for fast iteration so non-technical teammates could edit outputs quickly instead of starting from scratch.

Repayment Risk Simulator - Data Analysis Project

August 2025 - September 2025

- Cleaned and structured 2M+ loan records into an analysis-ready dataset using Python, handling messy real-world data.
- Built borrower segmentation to surface which factors actually separate good and bad outcomes for decision-makers.
- Visualized findings in Tableau so both technical and operational audiences could read the results at a glance.

EXTRACURRICULARS

Wharton Global Youth Program – Intro to Personal Finance TA | Philadelphia, PA

August 2025 - Present

- Facilitated tech-enabled financial education sessions for 700+ students nationwide, supporting interactive, tech-enabled learning.

Penn Varsity Track and Field | Philadelphia, PA

August 2022 - Present

- Earned Second Team All-Ivy in recognition of academic excellence and outstanding performance in the 400m, 200m, and sprint relays.

Munro College Track and Field – Varsity Team Captain | St. Elizabeth, Jamaica

September 2014 - June 2019

- Set a national age-group record of 52 seconds in the 400m which has been unbroken for over 10 years.
- Won gold at the national championship and earned runner-up honors in the 400m.

SKILLS

- **Programming:** Python, SQL, JavaScript, Rust
- **Data & Analytics:** Data cleaning and modeling, dashboards, reporting, pivot analysis, data validation, Tableau, Excel, Streamlit, Git
- **Operations:** Workflow design, process mapping, KPI tracking, pricing and logistics models, cross-functional rollout
- **Building:** Rapid prototyping, internal tool development, workflow automation, AI-assisted tooling
